CLAIMS

- 1. A precious metal-based amorphous alloy having a Pt-Cu-P based structure, wherein said alloy comprising in atomic %, $50 \le pt \le 75\%$, $5 \le Cu \le 35\%$, and $15 \le p \le 25\%$.
- 2. A precious metal-based amorphous alloy having a Pt-Pd-Cu-P based structure, wherein said alloy comprising in atomic %, $5 \le pt \le 70\%$, $5 \le pd \le 50\%$, and $5 \le p \le 30\%$.

3. The precious metal-based amorphous alloy according to Claim 1, wherein said alloy is obtained through solidifying the amorphous alloy in a molten state at a cooling rate of 10^{-1} to 10^{20} C/sec.

4. The precious metal-based amorphous alloy according to Claim 2, wherein said alloy is obtained through solidifying the amorphous alloy in a molten state at a cooling rate of 10^1 to 10^{20} C/sec.
